EXPERIENCE

Intern

HCLSoftware

📅 March 2025 - Sept 2025

📍 Bengaluru, India

- Played a key role in transitioning a client's monolithic application to a modular, **Packaged Business Capabilities (PBC)** oriented architecture, resulting in a significant improvement in deployment speed and system scalability; leveraged **Docker and Multi-node K8s** within Agile workflows to streamline delivery and enhance maintainability in several initial proof of concept (PoC) applications; implemented a **complete observability stack** including monitoring, logging, and distributed tracing to ensure end-to-end system visibility and maintainability.
- Was one of the first members of the **two-person migration team** tasked with **designing the migration plan**; contributed to the initial PoC validating the feasibility of implementing the client project in the new PBC-oriented architecture, and successfully migrated it while upgrading the tech stack along the way.

Contributor

GSSoC-ext'24

📅 Oct 2024-Nov 2024

📍 Remote

- Contributed to open-source projects as part of GSSoC-Extended 2024, demonstrating strong coding proficiency and collaborative development skills.
- Achieved a national rank of **281 out of 60,000** participants in GSSoC-Ext 2024, highlighting problem-solving ability and technical acumen.

PROJECTS

CODESOURCERER

Golang, Docker, Kubernetes (k3d), Helm, gRPC, GitHub, Git Actions, Gemini API

📅 Currently working on

- Developing an **AI-driven test generation tool** which can be integrated into the GitHub CI/CD pipeline.
- Components include **microservices based proxy server**, **GitHub App** for integration and various other **metric analysis tools**.
- This tool monitors code changes in **real-time**, ensuring test coverage with every push. We later added a custom Helm chart for easier deployments and ran it on a **lightweight, self-managed Kubernetes setup** using **k3d** to keep it resource-efficient.

Moodie

Kubernetes, Docker, VADER, React, Node.js, Reddit-API, Vite

📅 September 2023

- A **React-Node.js** project created for evaluating an individual's digital-social well-being through **sentiment analysis** using **VADER**; The project aims to analyze **Reddit posts**, assessing negativity, positivity, neutrality, and estimating overall mental health.
- Deployed and tested the project on a local **Kubernetes cluster**, simulating a production-like Kubernetes environment to validate deployment strategies.

EDUCATION

M.Sc. in Computer Science

Incoming @Winter Semester'25

📅 October 2025 - September 2027

Technische Universität Dresden, Germany

B.E in Computer Science

CGPA-9.2

📅 December 2021 - June 2025

Visvesvaraya Technological University, India

12th grade

Percentage-99

📅 June 2019 - September 2021

Malnad Pre-University College, India

SKILLS

• Programming Languages

C# Python Golang C
Bash Embedded-C

• Web & Backend

.NET React Node.js HTML CSS
Javascript

• DevOps & Infrastructure

Docker GitHub Kubernetes Terraform
Helm Prometheus Grafana Fluent-bit

AWARDS & CERTS

- **Top 1%** in GSSoC ext'2024.
- **Level 4** contributor in Hacktoberfest 2024.
- **HCLSoftwareU** DevOps Foundation.
- **AZ-305**: Azure Architect Design (Prereq).
- **AWS** Cloud Practitioner Essentials.
- **Postman** API Fundamentals Student Expert.

LANGUAGES

- **Advanced** : English (C1), Kannada
- **Intermediate** : Hindi
- **Beginner** : German
